

ANNOUNCEMENT

PSE Power – continuing 24 | 7 | 365 availability

PSE Power have activated our detailed Covid-19 contingency plans, in view of emerging developments and the very imminent prospect of widespread workplace closure and the deployment of other emergency strategies.

PSE Power recognise now more than ever, the concerns and worries you may have regarding your critical backup power facilities. Security of supply must be maintained during these difficult times, so please rest assured that PSE Power have the resources and manpower to keep your critical backup power available 24/7/365.

We have prioritised all preventative maintenance scheduling and emergency repairs for all critical power units (standby generators and uninterruptible power supply systems).

We are in constant liaison with our suppliers to assure immediate access to additional temporary backup generators and UPS systems.

We are strictly adhering to and taking immediate action on the advice, guidelines and recommendations of the National Public Health Emergency Team and the Chief Medical Officer. All staff are briefed daily in this regard and all necessary precautions actioned.

If there are any site-specific additional measures you want us to implement, please contact us immediately.

Our emergency contact numbers are:
